### OIG Selected by Trico Products to Provide e-Procurement Services

**AUBURN HILLS, Mich., (June 22, 2009)** – [Osiris Innovations Group](#) (OIG), a leading provider of e-business, supply chain management and supplier enablement applications, has been selected to provide its services to [Trico Products](#), furthering the company's position as a leader in the e-procurement industry.

Trico Products, one of the world's largest manufacturers of wiper blades and systems, has selected OIG's **OIG Procure** with **OIG Payment**, both of which are designed to enhance an organization's supply chain management by streamlining its procurement processes.

"Our services render tangible benefits, both short and long term," said OIG CEO David Saroli. "Our e-business applications provide our customers a completely standardized and automated procurement process, which leads to increased efficiencies and greater control over time management."

A robust application that standardizes and automates the procure-to-pay-to-reconcile cycle, **OIG Procure** offers a complete solution to the purchase order management process. While **OIG Payment**, OIG's PCI compliant card payment processing platform is integrated into **OIG Procure** to provide full access to all payment and reconciliation functions.

"OIG is yet another innovative business partner allowing our organization to better focus on locating and identifying the most advanced and efficient suppliers," said John Kozma, Trico's vice president of purchasing.

### About OIG

Privately-held and headquartered in Auburn Hills, Mich., Osiris Innovations Group (OIG) is an e-business solutions provider and expert in supply chain management and supplier enablement. Combining decades of non-production purchasing experience with a striking e-business solution, OIG helps companies reduce costs, errors and cycle times throughout the supply chain. For more information about OIG, visit [www.osirisig.com](http://www.osirisig.com), or call (248) 236-0644.
